EXHIBIT A STATEMENT OF WORK

A. BACKGROUND AND PURPOSE

The State of California's prison medical system was placed into Receivership by United States District Court Judge, Thelton E. Henderson, as a result of a 2001 class action lawsuit brought against the State of California over the quality of medical care in the State's prison system. The Court found that the medical care was a violation of the Eighth Amendment of the U.S. Constitution, which forbids cruel and unusual punishment of the incarcerated.

All activities of the Receivership have one common purpose: to create a collaborative environment where custody and health care staff improve upon the quality of medical services in California prisons in order to meet constitutional standards while reducing avoidable morbidity and mortality. The Receiver has adopted six goals that are necessary for the California Department of Corrections and Rehabilitations (CDCR) health care program to rise to constitutionally acceptable and sustainable levels. The goals are: 1) ensure timely access to health care services; 2) establish a prison medical program addressing the full continuum of health care services; 3) recruit, train and retain a professional quality medical workforce; 4) implement a quality assurance and continuous improvement program; 5) establish medical support infrastructure; and 6) provide for necessary clinical, administrative, and housing facilities.

The above goals encompass key aspects of the CDCR's health care delivery system and the Receiver has initiated organizational changes to improve medical, nursing, mental health, and dental programs. California Correctional Health Care Services (CCHCS) has embarked on a number of informational technology (IT) projects to support the Receiver's efforts in raising the level of patient-inmate health care to constitutional standards. The goal of this effort is to improve business processes related to scheduling patients for medical, dental, mental health, and telemedicine appointments.

The Project Manager (PM) will be responsible for managing the schedules of multiple projects that interface with Strategic Offender Management System (SOMS). SOMS is a CDCR system that standardizes adult and parole data and population management practices enterprise-wide. CCHCS has multiple applications and systems requiring interfaces to SOMS. The PM also will be responsible for change management and change control in coordination with CCHCS and CDCR programs.

The consultant will report to CCHCS' Deputy Chief Information Officer (DCIO), Health Care Information Solutions (HCIS), or designee(s).
